1.	Dr. Friedrich Klauer, who is employed at the Auerge also has a plant of his own in which he is manufact weak currents. These resistors are constructed of mounted on surfaces of quartz or amber. They have and are used for measuring radiation due to radioac	uring strong resistors for platinum or other metals a resistance of 10 ⁹ to 10 ¹⁰ ohms,
2.	It is reported that East-German industrial enterpri	ses are showing intense
